JOSHUA

GAINS IN THE EDUCATION OF MATH AND SCIENCE (GEMS) ALUMNI

I am a high school junior with plans to study computer science and technologies.

BEST THINGS ABOUT THE PROGRAM

One of the best aspects of this year's GEMS program was the hands-on lessons I experienced with new technology and software. The program kept students engaged while learning.

HOW PARTICIPATING IN AEOP INSPIRED YOU TO ADVANCE IN STEM

I had been interested in the STEM field since the beginning of sixth grade. But after learning the vast opportunities in this field within the Army, I had a reason to stay interested.

WORDS OF ADVICE

These programs from AEOP show students how the engineering field applies to the world, giving us a better idea of what we want to be when we grow up. Whether you decide to follow this path or your own is entirely up to you.

These programs from AEOP... [gave] us a better idea of what we want to be when we grow up.
