## AANYA eCYBERMISSION

I am in grade 6, and in the future, I plan on expanding my horizons more and more in the STEM field.

### WHO IS YOUR FAVORITE STEM ROLE MODEL?

My favorite STEM role model is Albert Einstein, because of his vast knowledge. Einstein thought outside the box and was very innovative. His ideas affect us to this day.

### BEST THINGS ABOUT THE PROGRAM

In my opinion, the best things about participating in the eCYBERMISSION program was being able to benefit the community using STEM, learning more, and working together as a team. I also enjoyed getting an “out of the classroom” experience with STEM. eCYBERMISSION taught me how I can apply science to solve real world problems. Through this program, I was able to meet with several people and expand my networks. Participating in eCYBERMISSION has been a very valuable experience.

### HOW HAS PARTICIPATING IN AEOP INSPIRED YOU TO ADVANCE IN STEM

I realized that STEM is not just lab experiments and engineering — there are many avenues to explore in STEM fields. The program sparked my interest in science, math, engineering, and technology. Through AEOP, I got to learn so much more, which encourages me to expand my boundaries even more.

### WORDS OF ADVICE

To someone contemplating enrolling in an AEOP program, I would certainly encourage them to join. AEOP has given me such a great exposure to science, technology, engineering, and mathematics.
