Currently in high school

WORDS OF ADVICE

AEOP programs help you take a step forward from what you were before. They inspire you, and teach you so much, and I believe they make every student smarter, and more creative.

BEST THINGS ABOUT THE PROGRAM

eCYBERMISSION taught so much and gave me a lot of insight into the real world of STEM. It provided hands on activities like flying drones, building air filters, creating an assembly line, and so much more. I loved all the activities we got to do, and how it exposed me to all these new careers I didn't know about. GEMS was also amazing because we got exposure to tons of careers in the army, and some of the coolest technologies developing today.

HOW PARTICIPATING IN AEOP INSPIRED YOU TO ADVANCE IN STEM

There are so many issues in the evolving world, and AEOP inspires me to take a step into the future using STEM. It inspires me because I now believe that every problem can be solved with the help of STEM.

WHO IS YOUR FAVORITE STEM ROLE MODEL?

I have always been fascinated by Harrison Wells from the Flash, as he built a particle accelerator and discovered how to time travel. These topics are very interesting in my opinion.

WHAT ARE YOUR FUTURE HOPES AND DREAMS?

I want to pursue a career in computer science and wish to be the CEO of a leading tech company.
