Questionnaires

Purpose

Per the FY19 Army Education Outreach Program (AEOP) Annual Program Plan (APP), NC State University will conduct evaluation studies of CQL, SEAP, HSAP, URAP, and REAP that include two post-program questionnaires:

1. AEOP Participant Questionnaire to be completed by student participants of the apprenticeship programs; and
2. AEOP Mentor Questionnaire to be completed by apprenticeship mentors (typically DoD/Army scientists or engineers or university faculty) who support students as they participate in the apprenticeship programs.

Questionnaires are the primary method of data collection for AEOP evaluation and collect information about participants' experiences with and perceptions of program resources, structures, and activities; potential benefits to participants; and strengths and areas of improvement for programs.

The questionnaires are aligned with:

- Army's strategic plan and AEOP Priorities 1 (STEM Literate Citizenry), 2 (STEM Savvy Educators) and 3 (Sustainable Infrastructure);
- Federal guidance for evaluation of Federal STEM investments (e.g., inclusive of implementation and outcomes evaluation, and outcomes of STEM-specific competencies, transferrable competencies, attitudes about/identifying with STEM, future engagement in STEM-related activities, and educational/career pathways);
- Best practices and published assessment tools in STEM education, STEM informal/outreach, and the evaluation/ research communities;
- AEOP's vision to improve the quality of the data collected, focusing on changes in intended student outcomes and contributions of AEOPs like CQL effecting those changes.

Deployment of common questionnaires with items that are appropriate for all AEOP programs allows evaluators to compare findings across AEOPs and, if administered in successive years, to establish longitudinal studies of student outcomes through the pipeline of AEOP programming. Questionnaires incorporate batteries of items from established assessments that have been validated in published research making external comparisons possible.

All AEOPs are expected to administer a Participant and a Mentor questionnaire provided to them by NC State University. AEOP-wide Participant and Mentor questionnaires have two versions each; an "advanced" version (for JSHS and apprenticeship programs) and a "basic" version (for GEMS, JSS, and Unite). Similar item sets are used in both versions, with slight modifications to item wording or the number of items used to accommodate the needs of participants from each individual program. Additionally,

program-specific questionnaires have been customized to gather information about programmatic structures, resources, and activities that are unique to each AEOP.

Focus Group Site Visits and Phone Interviews

Purpose

As per the approved FY19 AEOP APP, the external evaluation of apprenticeship programs may include site visits/onsite focus groups or phone interviews with individual participants. In FY19, site visits were made to CQL and SEAP programs; phone interviews were conducted with HSAP, URAP, and REAP apprentices and mentors.

Site visits and phone interviews provide the evaluation team with first-hand opportunities to speak with students and their mentors. During site visits, we are able to observe the AEOPs in action. The information gleaned from these visits and phone interviews assists us in illustrating and more deeply understanding the findings of other data collected (from questionnaires). In total, the evaluation findings are used to highlight program successes and inform program changes so that the AEOPs can be even better in the future.

Evaluation Activities during Apprenticeship Site Visits:

- One or two 45 minute focus group with 6-8 apprentice participants;
- One 45-minute focus group with 6-8 mentors;
- 30-60 minutes to observe the program (specifically, to see students engaged in program activities, preferably with their mentors); and
- 10-15 minute transitions between each evaluation activity for moving groups in and out and providing evaluators with time to organize paperwork and take nature breaks.

Data Analyses

Quantitative and qualitative data were compiled and analyzed after all data collection concluded. Evaluators summarized quantitative data with descriptive statistics such as numbers of respondents, frequencies and proportions of responses, average response when responses categories are assigned to a 6-point scale (e.g., 1 = “Strongly Disagree” to 6 = “Strongly Agree”), and standard deviations. Emergent coding was used for the qualitative data to identify the most common themes in responses.

Evaluators conducted inferential statistics to study any differences among participant groups (e.g., by gender or race/ethnicity) that could indicate inequities in the Unite program. Statistical significance indicates whether a result is unlikely to be due to chance alone. Statistical significance was determined with t-tests, chi-square tests, and various non-parametric tests as appropriate, with significance defined at $p < 0.05$. Because statistical significance is sensitive to the number of respondents, it is more difficult to detect significant changes with small numbers of respondents. Practical significance, also known as effect size, indicates the magnitude of an effect, and it is typically reported when differences are statistically significant. The formula for effect sizes depends on the type of statistical test used, and is specified, along with generally accepted rules of thumb for interpretation, in the body of the report.

4 | Appendix B – Apprentice Focus Group/Phone Interview Protocol

Facilitator: My name is [evaluator] and I'd like to thank you for meeting with us today! We are really excited to learn more about your experiences in [apprenticeship program]. In case you have not been in a focus group/evaluation interview before, I'd like to give you some ground rules that I like to use in focus groups/interviews. They seem to help the focus group/interview move forward and make everyone a little more comfortable:

- What is shared in the focus group/interview stays in the room.
- It is important for us to hear the positive and negative sides of all issues.
- Only one person speaks at a time.
- This is voluntary - you may choose not to answer any question, or stop participating at any time.
- We will be audio recording the session for note-taking purposes only. Audio will be destroyed.
- Do you have any questions before we begin?

Key Questions

1. Why did you choose to participate in [apprenticeship program] this year?

- How did you hear about [apprenticeship program]?
- Who did you hear about it from?

The Army Educational Outreach Program (AEOP) is a primary sponsor of [apprenticeship program]. We do these interviews to help the AEOP create reports and defend funding for the program.

We need to understand more about how [apprenticeship program] is teaching students about STEM career opportunities in the Army and Department of Defense.

- During [apprenticeship program], did you learn anything about STEM careers in the Army or Department of Defense?
- How did you learn about them (e.g., field trips, invited speakers, other activities, etc.)?
- Are you interested in pursuing a career in STEM with the Army or Department of Defense?

2. The AEOP sponsors a wide range of national STEM outreach programs other than Unite. You are definitely eligible to participate in some of these programs and we need to know if you learned about them during [apprenticeship program]

- During [apprenticeship program], did you learn about any of the outreach programs that the AEOP sponsors? (CQL, SEAP, URAP, REAP, SMART, NDSEG, etc.)
- How did you learn about them?
- Do you think that you will try to participate in any of those programs?

3. Tell us about your experiences in [apprenticeship program] this year.

- What, specifically do you think you got out of participating in [apprenticeship program]?
- How do your experiences in [apprenticeship program] compare to your school experiences in STEM?
- What would you say was the biggest benefit you gained from participating in [apprenticeship program]?

4. Do you have any suggestions for improving [apprenticeship program] for other students in the future?

5. Last Chance - Have we missed anything? Tell us anything you want us to know that we haven't asked about.

5 | Appendix C – Mentor Focus Group/Phone Interview Protocol

Facilitator: My name is [evaluator] and I'd like to thank you for meeting with us today! We are really excited to learn more about your experiences in [apprenticeship program]. In case you haven't been in a focus group/evaluation interview before, I'd like to give you some ground rules that I like to use in focus groups/interviews. They seem to help the group move forward and make everyone a little more comfortable:

- What is shared in the room stays in the room.
- Only one person speaks at a time.
- If you disagree please do so respectfully.
- It is important for us to hear the positive and negative sides of all issues.
- We will be audio recording the session for note-taking purposes only. Audio will be destroyed.
- Do you have any questions about participating in the focus group/interview?

Key Questions:

1. When you think about [apprenticeship program], what kind of value does this program add?

- How do you think students benefit from participating in Unite?
- Can you think of a particular student or group of students that benefit the most from Unite?
- How have you benefited from participating in Unite?

One of the primary sponsors of the [apprenticeship program] program is the Army Educational Outreach Program (AEOP). The AEOP needs specific information to create reports and defend funding for its outreach programs.

2. We need to understand more about how [apprenticeship program] is helping students know more about STEM career opportunities in the Department of Defense, especially civilian positions.

- Have you seen any efforts by [apprenticeship program] to educate participants about the Army, DoD, or careers in the DoD?
- What strategies seem to be the most effective for apprentices in [apprenticeship program]?
- Do you have any suggestions for helping [apprenticeship program] teach apprentices about careers in the DoD?

The AEOP needs to know if [apprenticeship program] is teaching students about the other STEM outreach programs that it sponsors.

- First, are you aware of the other programs offered by the AEOP? (e.g., SEAP, CQL, SMART, etc.)
- Have you seen any efforts at [apprenticeship program] to educate adults or students about the other AEOP programs?
- What seems to work the best? The worst?
- Any suggestions for helping the AEOP educate apprentices about the other programs?

3. The AEOP is trying to make sure that its programs become more effective at reaching adult and youth participants from underserved and underrepresented groups (racial/ethnic groups, low SES, etc.).

- Have you seen any efforts by [apprenticeship program] to help engage underserved or underrepresented groups of adults and youth?
- What strategies seem to work the best? The worst?
- Any suggestions for helping Unite reach new populations of adult and youth participants?

4. What suggestions do you have for improving [apprenticeship program]?

5. Last Chance - Have we missed anything? Tell us anything you want us to know that we didn't ask about
